Profile

"Information Technology professional with a strong foundation in systems analysis, software development, and automation solutions. Proficient in database management and technical problem-solving, with a focus on leveraging technology to optimize operational efficiency. Dedicated to applying technical expertise to real-world challenges and contributing to innovative projects in a professional environment."

Projects

Smart Administrative & AI Security System

Automation & 3D Visualization

- **Admin Automation:** Developed "Circle 1.0" with **n8n** for automated attendance and real-time notifications.
- **AI Security:** Integrated **Computer Vision** for fire, smoke, and threat detection with instant alerts.
- **3D Monitoring:** Built an interactive **Three.js** interface for system architecture and live data tracking.
- **Data Sync:** Managed automated database synchronization and security logs via structured **API** workflows.

Education

2022 – 2026

Taiz, Yemen

B.S. in Information Technology

Alsaeed University

Skills

IT Automation & System Integration

● ● ● ● ●

- n8n Workflows, API Management, & Database Synchronization

Software Development

● ● ● ● ●

- Python, Java, C++, SQL, MySQL, and Firebase

Modern Web & AI

● ● ● ● ●

- JavaScript, Three.js, HTML5/CSS3, and Computer Vision.

Languages

• Arabic

• English
